EMERGENCY RESTORATION ACTIONS (ITEM 50-C, AGENDA OF DECEMBER 6, 2011)

On December 6, 2011, your Board ratified the proclamation of existence of a local emergency made on December 1, 2011, for the severe winds beginning in Los Angeles County on November 30, 2011, and instructed the Chief Executive Officer to provide status reports while the emergency restoration actions are underway.

This correspondence provides an interim status report of actions taken during and after the November-December wind storm by the Office of Emergency Management (OEM), Department of Public Works (DPW), and Department of Parks and Recreation (DPR). After the recovery phase has been completed, OEM will produce an After Action Report of all activities provided by DPW, DPR, other County departments, and our Operational Area partners.

DPW and DPR have submitted separate interim reports regarding their respective wind storm activities (Attachment I and II). The following is OEM's interim activities during and after the November-December wind storm.

NOVEMBER 28, 2011

 In anticipation of potentially strong Santa Ana Winds scheduled to impact the Los Angeles County Operational Area, OEM issued a County-wide notification regarding the warning provided by the National Weather Service to its elected Each Supervisor December 22, 2011 Page 2

officials, department heads, cities, unincorporated areas, and special districts. The attached document provides a series of chronological events and activities that were issued by OEM to the Operational Area partners and stakeholders during and after the November-December wind storm (Attachment III).

DECEMBER 1, 2011

- As a series of notifications were issued to Operational Area partners in response
 to conditions reported by County departments and cities, OEM in conjunction
 with the Sheriff's Department activated the County Emergency Operations
 Center (CEOC) in support of our Operational Area partners. Fifteen Operational
 Area cities and the County proclaimed a local emergency due to damages
 caused by the November-December wind storm.
- In correlation to its principle responsibility, OEM served as coordinator of
 information and activities, which included response and resource requests and
 dissemination of public information to County departments and Operational Area
 cities. Throughout the activation, OEM also coordinated with our private sector
 partners, non-profit and faith-based organizations, including Southern California
 Edison, American Red Cross, Salvation Army, and California Southern Baptist
 Disaster Relief.
- OEM coordinated with CEO Public Affairs Web Team to have press releases and updates on the November-December wind storm hosted on the County's web portal in a Special Alerts Section located on the homepage of the County's website in addition to OEM's webpage. Information was also disseminated through traditional media outlets and various social media networks, including Nixle, Twitter, and Facebook.
- OEM developed a Board Motion and proclamation of a local emergency that was ratified by your Board and signed by Mayor Michael D. Antonovich on December 6, 2011.

DECEMBER 2, 2011

 OEM deactivated the CEOC; however, OEM continued its efforts in coordinating assistance and information to the County departments and Operational Area partners. Each Supervisor December 22, 2011 Page 3

DECEMBER 5, 2011

- OEM began the recovery process by gathering Initial Damage Estimates from County departments and Operational Area partners.
- OEM activated the 211 LA County Disaster Hotline for residents, renters, and business owners to report their damages. Thus far, more than 900 residents, renters, and business owners have reported their wind storm-related damages to 211 LA County Disaster Hotline. It should be noted, as reported by Southern California Edison, this storm was the eleventh largest storm in Southern California Edison's history (Attachment IV).

DECEMBER 9, 2011

• OEM coordinated with the California Emergency Management Agency (CalEMA) Southern Region Office and Disaster Management Area Coordinators (DMACs) from Area C and D in co-hosting a Preliminary Damage Assessment (PDA) tour with CalEMA Acting Secretary Mike Dayton. The tour encompassed seven incorporated cities and one unincorporated area of the County. The tour attendees included elected officials: California State Senator Carol Liu, Assembly Members Anthony Portantino and Mike Eng, and Supervisor Michael D. Antonovich. In addition, there was a representative from U.S. Congressman Adam B. Schiff's office.

DECEMBER 12-13, 2011

 OEM collaborated with the DMACs from Area C and D to provide support to the PDA teams who toured the damaged areas with representatives from the U.S. Small Business Administration (SBA) and CalEMA.

DECEMBER 14-16, 2011

 OEM teamed up with the DMACs from Area C and D in coordinating PDA tours of the damaged areas with representatives from the Federal Emergency Management Agency and CalEMA.

Presently, the wind storm local emergency is still in the early stages of recovery. OEM continues to provide support to SBA at its Disaster Loan Outreach Center, located in the City of Pasadena Fire Headquarters. The Center opened on Monday, December 19, 2011, to residents, renters, and business owners and will remain open until Friday,

Each Supervisor December 22, 2011 Page 4

December 23, 2011. The Center will re-open on January 9, 2012. OEM will work with CalEMA in determining where Local Assistance Centers will be positioned to assist the residents of Los Angeles County.

We will continue to provide updates of our emergency restoration actions as our efforts progress. Should you have any questions of the information provided, you may contact me or a member of your staff may contact Senior Manager John Fernandes, OEM, at (323) 980-2261.

OEM.Emerg Restoration Actions.Item 50-C.Agenda 120611.bm.122211

DEPARTMENT OF PUBLIC WORKS Emergency Restoration Actions

Public Works responded to the December 1, 2011, Windstorm Incident by committing over 300 emergency response personnel to the effort within the unincorporated areas and neighboring cities impacted by the incident. The most heavily impacted unincorporated areas were Altadena, Arcadia, Monrovia, Duarte, Temple City, and La Crescenta. The initial response focused on making roads passable. Operations then transitioned to clearing the roads and hauling away debris. At the height of the event, approximately 100 unincorporated area roads were closed due to fallen trees, debris, and downed power lines. Public Works received approximately 150 calls to our dispatch center related to the loss of electrical power, including flashing red or dark traffic signals. Public Works' Sewer Maintenance Districts reported the loss of power to several sewage pump stations in the Cities of Irwindale and La Canada Flintridge and the unincorporated community of Agoura.

To date, the estimated cost for emergency response and damage to Public Works' infrastructure and facilities is \$7,665,000. The great majority of the costs are due to windstorm debris clearance and disposal with only about \$450,000 in actual damage to infrastructure assets.

Roadways - \$6,235,000 Flood Control Facilities - \$1,400,000 Sewer Maintenance Facilities - \$30.000

Public Works also provided the equivalent of about 900 person-days in labor and committed significant equipment resources to the Cities of La Canada Flintridge and Pasadena and the County Department of Parks and Recreation to assist in the cleanup of windstorm debris. Major assistance to La Canada Flintridge and County Parks and Recreation has concluded, and the City of Pasadena anticipates needing Public Works' assistance through the month of December. We estimate the total cost of the assistance to the Cities and County Parks and Recreation to be \$570,000.

Public Works worked closely with the media to inform the public in affected communities on the progress of clearing debris and re-opening roadways for use. Public Works also coordinated with the media and with waste haulers to publicize and conduct green waste collection events for residents in La Crescenta, Altadena, Kinneloa Mesa, East Pasadena, East San Gabriel, Citrus, and East Charter Oak. The Coordinated Agency Recovery Effort (C.A.R.E) website was also used to disseminate this information. Public Works issued a total of seven press releases for this emergency.

Public Works was successful in clearing away the fallen tree and windblown debris, as well as repairing the damaged electrical system for the outdoor lighting display on Santa

Rosa Avenue in Altadena in time for the December 10, 2011, event that transforms this route into "Christmas Tree Lane."

We expect the cleanup of County unincorporated roadways to continue through January 2012. Due to the loss of several hundred parkway trees along County roads, Public Works will be pursuing the planting of replacement trees. Public Works will also submit our costs for emergency response and estimates for damage repairs to the Office of Emergency Management in anticipation that there could be State reimbursement resulting from the Governor's disaster declaration.

Department of Parks and Recreation November – December 2011 Wind Storm Response

Update As of Tuesday, December 20, 2011

At 4:30 AM on the morning of Thursday, December 1, 2011 County Park Supervisors began mobilizing for a response to the night's devastating wind storm. As dawn broke the damage began to come into perspective and when a full accounting could be done it included:

- 15 parks without power requiring cancelation of many programs
- 33 parks with trees down or severely damaged
- 1,300 trees completely toppled, uprooted or requiring extensive trimming
- Six parks or golf courses closed for several days including:
 - Arcadia County Park
 - Los Angeles County Arboretum and Botanic Garden
 - Still closed; planned to reopen on December 26th
 - Descanso Gardens
 - Santa Anita Golf Course
 - Altadena Golf Course
 - Eaton Canyon Golf Course
- Loss of trees valued at over \$7 million
- Damage to infrastructure of over \$650,000
 - Fences, light poles, picnic tables, irrigation lines, electrical conduits, golf course driving range safety netting and poles
- Debris cleanup cost estimated at over \$750,000 in contractor work alone
- Over 3,000 hours of overtime has been expended
- Over 10,000 hours of regular personnel time has been utilized
- Public Information and Communication
 Park Staff directly informed park patrons of park status
 Numerous traditional and social media releases including web postings, Facebook, Twitter
 Coordination with CEO, OEM and LASD Parks Bureau

On Thursday the Director requested assistance from the CEO and OEM. All available crews from the County Parks Department were mobilized and put to work focusing on Arcadia Park where a severe public hazard existed as people were wandering among the toppled trees and crossing Caution Tape lines to view the damage. Los County Sheriffs Parks Bureau deputies immediately began patrolling the park for safety and attempted to keep the public out. Deputies went on 24-hour patrol at the park for a week to maintain public safety

Parks resources included over 200 personnel serving on Tree Crews, Grounds Maintenance, Trails Division Crews, Tree Farm Crews, Arboretum and Descanso staff and Transportation Crews who brought Court Referral workers to the site. Crews were put on 12-hour shifts working dawn to dusk and through the weekend.

On Friday the Director spent the day in the field working with managers coordinating resources including meeting with Diego Cadena, Assistant Director from the County Department of Public Works which sent several crews to assist. Additional resources were also provided by Los Angeles County Agricultural Commissioner/Weights and Measures and Los Angeles County Fire Department. Over 60 personnel responded.

At one point over 150 people were working at the Arboretum alone. At both Descanso and the Arboretum volunteers were also utilized. The Parks Department and Public Works Department also responded to a City of Arcadia request to quickly remove fallen trees from Santa Anita Golf Course which were partially blocking Campus Drive. That was accomplished on Friday and Saturday removing any traffic congestion for the school opposite the golf course, allowing normal school functions on Monday.

Parks Department coordinated with Internal Services Department to expedite emergency contracts and procurement documents to get supplies and services needed for clean-up. Contracts Unit began writing a draft motion which Supervisor Antonovich brought in the following Tuesday and which was approved by the Board of Supervisors allowing the Department to amend existing landscape maintenance contracts to include debris clean-up work.

By Monday, December 5, 2011 Arcadia Park was safe to reopen to the public as were portions of Descanso Gardens. All three golf courses were reopened with limited play reducing impact of loss of revenue which factors into the Department's operating budget.

At the golf courses staff worked closely with the operators to coordinate repair to fences, light standards and protective safety netting and poles on the driving ranges.

At all 33 affected parks staff has inventoried tree loss and is generating a replanting plan and should soon have estimated costs of tree replacement. This is especially acute at the Arboretum which suffered the loss of many rare specimens including four trees over 60-inches in diameter and more than 150-years old valued at almost \$100,000 each.

Four community parks were available for citizens to deposit their own debris with Department of Public Works personnel standing by to haul the debris away.
